DETAILED ACTION

Status of the Claims

1. The preliminary amendment received on August 18, 2006 amended claims 5-7 and added new claims 12-13.

Claims 1-13 are currently pending and under consideration.

Election/Restrictions

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-6 and 12-13, drawn to method of producing a DNA array.

Group II, claim(s) 7-9, drawn to a DNA array.

Group III, claim(s) 10, drawn to a method of analyzing a modification in a DNA.

Group IV, claim(s) 11, drawn to a method of purifying dsDNA fragments.

3. The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the common technical feature is a library of DNA fragments having cohesive ends and modified bases.

Barany et al. (U.S. Patent 6,506,594 issued January 14, 2003) teach LDR and LCR reactions (i.e. DNA fragments with cohesive ends) on arrays wherein the LDR and LCR nucleic acids and final products are modified.

Art Unit: 1639

4. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

5. The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
